**LAMPS / LAMPES**  
**LÂMPARAS / ILUMINAÇÃO**

## Project: Beute

**Design Firm:** Herrwolke;  
**Designer:** Michael Konstantin Wolke;  
**Photography:** Michael Konstantin Wolke.

Through the variety of corrugated cardboard which can only be reached by using discarded material, "Beute" becomes a selection of unique light objects. By dissecting and rearranging of the material, the designer compresses the conquered corrugated cardboard and uses it as raw material with specific characteristics. ■

## Project: Six-pack Ring Pendant Lights

**Design Firm:** Relevé Design;  
**Designer:** Bao-Khang Luu;  
**Photography:** Bao-Khang Luu.

The six-pack ring pendant light collection draws inspiration from modern shapes and natural forms in plants. Each light uses between 100-400 post-consumer six-pack rings and weighs from 4-12lbs. Using two techniques that took over a year and a half to develop, the six-pack rings are hand-woven or strung onto metal rings. This eliminates the use of additional adhesives or extraneous connectors. The two constructions allow for a variety of different forms. The construction methods also allow the lights to be compressed resulting in more efficient shipping. UL wiring parts and a low heat emitting LED light bulb complete the pendant light. At the end of its lifecycle, each lamp can be deconstructed easily. ■
